SUMMARY

Product and UX/UI designer with 8+ years in fintech, ride-sharing, digital wallets and secure messaging. On most teams I was the only designer, so I owned the work end to end: research, information architecture, the design system, and the developer hand-off. My first degree is in industrial design, which is where the branding and 3D work come from. Since moving to Germany I have reached B2 German and started building my own products, including a booking site I still run and a Persian–German vocabulary app with AI-generated cards.

WORK EXPERIENCE

Designer & Developer — Independent projects

Jan 2025 – Present · Schwetzingen, Germany

- Built and launched **marefatpilgrimage.com** on my own with AI-assisted development — brand, UX, booking and payment flows, and the service structure behind them. The site is live and I keep it running.
- Made **Leitner**, a Persian–German vocabulary app that generates card content (translation, article, plural, example sentences) with AI and switches between RTL and LTR. In daily use.

Salesperson

Jun 2025 – Present · denn's Biomarkt, Germany

- Daily customer contact in German while I look for a design role and keep building my own products alongside it.

Further Education & Self-Study

Oct 2022 – Mar 2024 · Germany

- Took German from A2 to B2 and worked out how to fold AI tools into a real design and build workflow.
- Part-time support at Illa Solution alongside the coursework.

UX/UI Designer & Design Lead

May 2022 – Oct 2022 · Palphone, Remote (Australia)

- Led the UX/UI team and set product direction for a secure messaging app on iOS and Android.
- Rebuilt the navigation around people and active conversations, and added new communication features.
- Set up a shared component library so both platforms shipped in sync. *Result: users found it noticeably easier to get around.*

SKILLS

UX

User research · user flows · wireframing · prototyping · usability testing · information architecture

UI & Systems

Design systems · app design (iOS/Android) · responsive web · interaction & motion

Brand & Visual

Corporate design · logo · social media · 3D visualisation

Build

HTML · CSS · JavaScript · React · Next.js · Supabase · AI-assisted workflows

TOOLS

Figma · Sketch · Adobe XD · InVision · Zeplin · Illustrator · Photoshop · ProtoPie · Rhino 3D · 3ds Max · SketchUp · Jira · Miro

LANGUAGES

Persian	Native
German	B2 · telc Beruf
English	Basic (A2) · reading proficient

CORE STRENGTHS

Problem solving · creativity & ideation · quick learning · teamwork · analytical thinking · research & planning · project management

WORK EXPERIENCE — CONTINUED

Freelance UX/UI Designer & Brand Consultant

Nov 2020 – May 2022 · Semedco · TGA Tour & Travel · Aria Travel Point

- Designed a stock-analysis platform, turning dense financial data into a dashboard people could actually read.
- Handled full branding for two travel agencies, from the logo to a structured social-media system.

UX/UI & Graphic Designer

Apr 2018 – Nov 2020 · Phonepay, Iran

- Owned end-to-end design for a digital wallet built for the Iranian market, from first flows to final screens.
- Ran the visual brand across the app, website and marketing, which lifted engagement and kept the look consistent.

UX/UI Designer

Dec 2016 – Apr 2018 · Carpino, Iran

- Designed the driver and passenger apps for a fast-growing ride-sharing service with live location tracking.
- Put ride requests, driver matching and trip status onto one live map. *Result: faster booking and fewer taps to get moving.*

UX/UI Designer

Apr 2015 – Dec 2016 · FanavaCard ePayment, Iran

- Designed a mobile payment app used by over a million people for transfers, top-ups and bill payments on iOS and Android.
- Simplified the first-run flow and grouped services by what people came to do, which cut drop-off.

SELECTED PROJECTS

marefatpilgrimage.com — Pilgrimage booking site: brand, UX, payment and service setup, built with AI-assisted development. Live, and run by me.

Leitner — Persian–German vocabulary app with AI-generated cards. I built it because nothing out there handled Persian the way I wanted. In daily use.

Palphone — Secure messaging app for iOS and Android; design lead, navigation rethink, and the shared component library.

EDUCATION

B.Sc. Industrial Design
IAU University of Art & Architecture, Tehran
2005 – 2010 · final grade 1.75

CERTIFICATIONS

Google UX Design Professional · 2020–21
